

MOTHERS are like buttons, they hold everything together.

# Vinyl Stencil DIY Wood Sign

by LZ Cathcart : <https://thesummeryumbrella.com/diy-mothers-day-wood-sign/>

## Materials needed

- 1x pre-painted cabinet grade plywood in your desired size.
- [Silhouette CAMEO](#) & mat
- Vinyl
- Transfer tape
- Squeegee/credit card
- Spray paint/airbrush
- Wood for framing

## Step 1

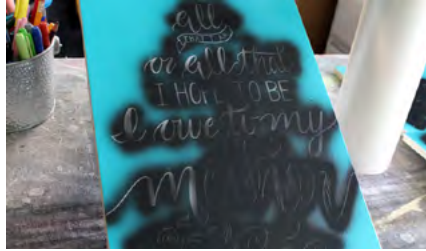

Download/create/illustrate text that you desire.

Using the CAMEO cutter, cut out the template from above with the vinyl on your mat.

Remove the vinyl from the mat and apply the transfer tape. Then remove the backing from your vinyl.

## Step 2

Line up the vinyl accurately onto your board and use a squeegee/card to push down and remove any bubbles.

Remove the transfer tape so only the vinyl is shown on the board.

It is important that you apply and use the vinyl stencil carefully. Do not apply too much paint, but rather in light layers so the paint does not go underneath the vinyl and smudge your board.

## Step 3

Once your paint has dried, carefully remove the vinyl. To go for a rustic look, sand down the sign and spray it with a general cleaner and scrub it down. A little bit of paint will come off giving it an amazing rustic look.

## Step 4

When it's all dried up and looks as what you desired it to be, spray it down with a matte/varnish finish for protection. You can then frame it up, all ready for mum.
