

TEXPRINT SUBLIMATION PAPER ON CERAMIC MUGS WITH A MUG PRESS

1. Set temperature to 400°F
2. Set timer to 240-270 seconds.
3. Set Pressure at heavy.
4. Print a mirror image onto Texprint Paper.
5. Trim the edges of the image and wrap around mug.
6. Attach the image to mug using transfer release tape.
7. Wrap mug with a Teflon sheet and place in mug press.
8. Press at 400°F for 4-4.5 minutes with heavy pressure.
9. Remove immediately from press once finished and peel hot.
10. Dip mug into warm water to end the sublimation process and avoid ghosting.
