WELCOME

Sytech Supplies is a proudly South African importer and distributor of high-quality signage and digital print materials. Our roots trace back to the early 90s, when industry pioneer Malcolm Groger founded Computer Plus. After a journey of growth and realignment, Sytech Supplies was officially launched in 2002 - driven by a clear vision to serve the signage and printing industry with passion, integrity, and innovation.

Although Malcolm sadly passed away in 2025, his legacy remains deeply woven into the fabric of Sytech. His son now carries that legacy forward, leading the company with the same heart, values, and unwavering commitment that defined his father's vision.

Today, Sytech is known for providing the signage industry with affordable, reliable material solutions - from printable and pigmented vinyl to vehicle wrap media, motorbike media, rigid substrates and finishing tools. We proudly import and represent trusted global brands such as Metamark, KPMF, RTape, ProMedia, TITAN, Wraptile Tool Kits, Paint Protection Film (PPF) solutions, and a variety of flexible and rigid substrates.

Our head office is located in Durban, and we have a growing, vibrant branch in Johannesburg. Together, these locations give us strong national reach - backed by a passionate, customer-focused team that brings fresh thinking, technical expertise, and a solutions-driven approach to every interaction.

At the heart of Sytech is a passion for people, from the printers, installers, designers, business owners, and creatives who make this industry what it is. We believe in building lasting relationships, offering hands-on training and support, and bringing the right solutions to our customers so they can grow with confidence. From start-up studios to seasoned signage pros, we're here for every step of the journey.

ABOUT OUR VINYL

We use our years of experience in this industry to source the best brands that you know and trust to be the best of the best. This ensures that years down the line, your product will still be supported.

We ensure that the products we source are fully tried & tested, giving you the peace of mind you need to ensure all your projects are completed within the scheduled time.

Our product variety ensures that you do not need to waste time searching elsewhere for all your sign-writing requirements. You will be pleasantly surprised to find that we keep all your signage and graphics needs under one roof and at the best price possible.

03

CLIMATE ZONES AND VINYL DURABILITY

Dear Customer,

Kindly note that the lifespan of vinyl films is dependent on the zone in which the vinyl is applied. The regional climate (zone) of a country is the main factor which will reduce the expected performance, along with the angle and exposure of the application. Other factors include preparation of the substrate, method of application, cleaning and maintenance process.

Sub-Saharan Africa experiences a harsher climate and as a result, lies between zones 2 and 3. This means that vinyl films actually have a shorter lifespan than the product standards indicate in this catalogue. These product standards are as per the specifications of our suppliers.

The zone that you are in impacts the durability of the vinyl so it is imperative that you select your media wisely when purchasing any of the following products.
The expected durability in each zone differs from brand to brand. If you have any questions about zonal conditions, it is suggested that you chat to one of our trusted sales reps to find out which products work best for which applications.

The Sytech Team

> *"Our focus is on supporting our customers to achieve their best work all of the time"*
>
> - Malcolm Groger
> (Founder of Sytech Supplies)

Sytech Supplies is the official distributor of KPMF products in Sub-Saharan Africa.

ABOUT KPMF

KPMF's range of classic vehicle wrap products are designed for applications including total vehicle coverage and graphics. The material is designed to be removable, under controlled conditions, up to a period of 5-7 years without leaving adhesive transfer. The 100 micron thickness offers excellent cutting and weeding properties making it perfect for signs and decal applications. Our KPMF series of wrap vinyl offers superior quality, soft PVC films formulated using the latest advances in pigment technology. Offering exceptional dimensional stability and long-term durability.

Produced on KPMF's Airelease Premium air release liner.

GLOSS/MATTE

The original hybrid wrap (VWS 1)
[K88 000/K89 000 series]

The K88 000/ K89 000 series are formulated using the latest advances in pigment technology to form superior quality soft hybrid PVC films. Perfect for vehicle coverings and graphic applications, the VWS 1 offers exceptional dimensional stability and long-term durability as well as superb cutting and weeding properties.

Thickness	Construction	Width	Printable
100 Micron	Hybrid PVC	1524mm	Yes

Produced on KPMF's Airelease Premium air release liner.

STARLIGHT/ PEARLESCENT

Luxury effects films (VWS 4)
[K75 000 series]

The K75 000 series include Starlight and Pearlescent products that are both dual cast PVC films specifically developed for vehicle wrapping where a unique and innovative finish are needed. Formulated using the latest advances in pigment technology to offer exceptional dimensional stability. The VWS 4 is suitable for both interior and exterior applications.

Thickness	Construction	Width	Printable
100-110 Micron	Cast	1524mm	No

Produced on KPMF's Airelease Premium air release liner.

METALLIC

Matte and gloss metallic film (VWS 4)
[K75 000 series]

Formulated using the latest advances in pigment technology to offer exceptional dimensional stability, long term durability and amazing colour options.
The K75 000 series is an assortment of premium quality cast PVC films specifically developed for vehicle wrapping. The VWS 4 is suitable for both interior and exterior applications, available in gloss and matte

Thickness	Construction	Width	Printable
80 -100 Micron	Cast	1524mm	No

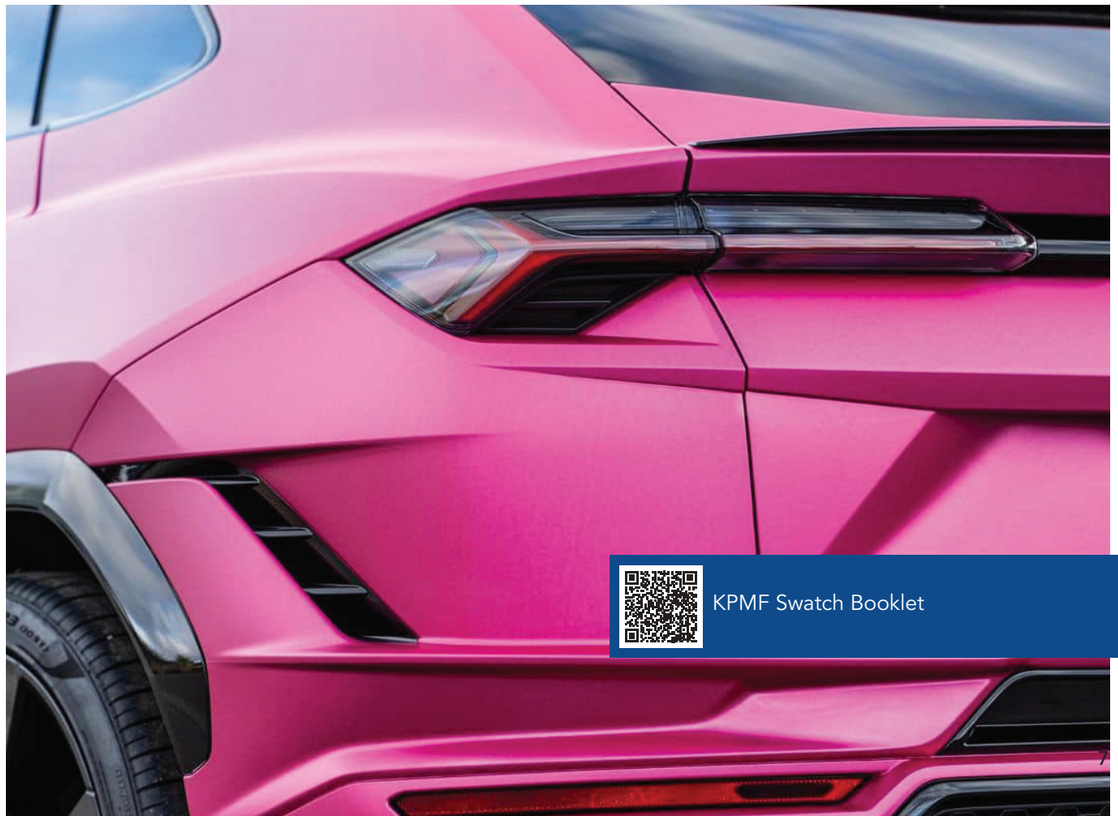

Produced on KPMF's Airelease Premium air release liner.

SUPER HIGH GLOSS

High gloss vehicle wrap

High glossy vehicle wrap consisting of a premium quality, soft PVC film topped with a clear coating supplied on a polyester liner. It offers exceptional high gloss appearance, increased durability and scratch resistance. Developed for panoramic roof applications, perfect for vehicle graphics, sign and decal applications.

Thickness	Construction	Width	Printable
120 Micron	Hybrid	1220,1524mm	No

KPMF Swatch Booklet

Produced on KPMF's Airelease Premium air release liner.

IRIDESCENT

Iridescent colour shift film (VWS 4)
[K75 000 series]

The K75 000 iridescent products are dual cast PVC films specifically developed for vehicle wrapping where a distinctive colour effect is desired. The VWS 4 is suitable for both interior and exterior applications. Available in a gloss and matte finish, the iridescent range is formulated using the latest advances in pigment technology to offer exceptional dimensional stability, long term durability and amazing colour options.

Thickness	Construction	Width	Printable
80 -100 Micron	Cast	1524mm	No

OVERLAMINATE

Speciality overlaminate

The luxurious and innovative overlaminates transform any application with the creation of a sparkling starlight or subtle pearlescent appearance. K71 000 series are high quality cast overlaminate films that were developed for use as vehicle wrap overlaminate, also in the digital imaging industry. The films allow the user to produce unique custom colours. A benefit, they permanently enhance and promote both solid colour and print media.

Thickness	Construction	Width	Printable
60 Micron	Cast	1524mm	No

DESIGN WITHOUT LIMITS

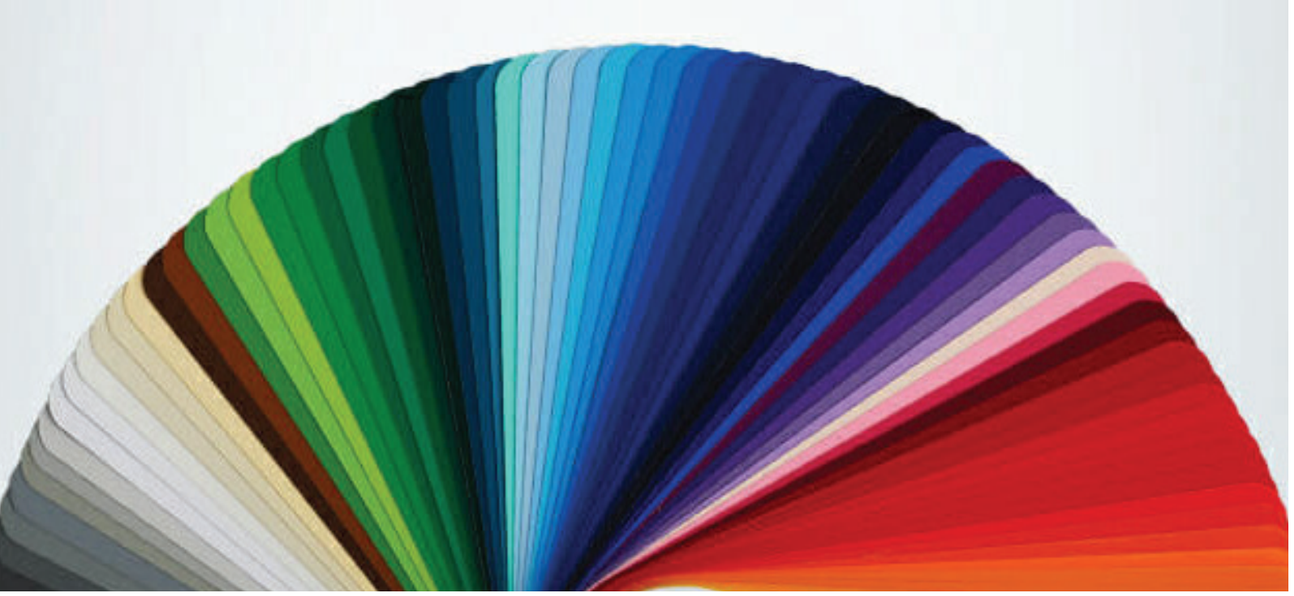

KPMF (originally Premium Marking Films, later Kay Premium Marking Films) has been producing premium quality self-adhesive vinyl films since 1991 at its purpose-built facility in South Wales, UK.

In 1995 the company was acquired by Kay Automotive Graphics of Michigan, USA, strengthening its global reach and expertise in automotive graphics.

KPMF was an early pioneer in vehicle wrap films, including the development of products used for full vehicle colour change, which helped establish vinyl wrapping as a widely adopted alternative to paint.

In 2019, KPMF became part of the ORAFOL Group, combining its technical capabilities and global network with ORAFOL's expertise while continuing to operate under the KPMF name as a premium film provider.

METAMARK
The Materials Company

Sytech Supplies is the official distributor of Metamark products in Sub-Saharan Africa.

SIGN MEDIA

Metamarks Sign Media provides premium self-adhesive sign materials and printable digital media used by professional sign makers and graphic installers to create long-lasting, high-impact visual communications, from signage and vehicle wraps to architectural and promotional graphics.

Added benefits	Available in air release	Available in air release

SQUEEGEES

Premium white	Felt Edge Squeegee
A really nice to handle squeegee in a medium to hard compound. This Metamark squeegee is really versatile with a precise edge and premium feel.	This innovative 2-in-1 squeegee from Metamark has the perfect blend of a soft grade edge and felt scratch-free edge for a smooth glide through signage and graphics.

WHAT IS MOTTLING?

What are its effects and how can it be removed?

PROMEDIA

ProMedia is a versatile range of self-adhesive and printable vinyl media offered by Sytech Supplies for the signage, digital graphics and outdoor display industry. It includes a variety of printable substrates such as polymeric and PVC vinyl, clear and opaque media, and high-tack options, designed for use with wide-format digital printers and cutting systems. These materials are suitable for indoor and outdoor signage, vehicle advertising, decals, labels and general graphics applications, providing reliable adhesion and strong print performance across diverse projects.

Sytech Supplies distributes ProMedia alongside other major media brands, giving sign makers and print professionals a broad selection of quality digital print media and vinyl solutions tailored to different installation needs.

MATERIAL THAT STICKS

Printable vinyl traces its origins back to the early 20th century, when PVC (polyvinyl chloride) was developed as a flexible plastic material. In the 1930s and 1940s, companies like BFGoodrich began refining PVC for practical use, and by the 1950s, vinyl films were being used for military markings, aircraft identification, and industrial labeling. As printing technology evolved, manufacturers such as 3M and Avery Dennison pioneered adhesive-backed vinyl films that could be printed, cut, and applied easily to surfaces.

By the late 20th century, advances in digital printing transformed vinyl into a powerful advertising medium. Printable vinyl allowed businesses to produce full-color graphics for vehicles, windows, walls, and signage quickly and affordably. Today, printable vinyl has revolutionized visual communication—turning virtually every surface, from cars and storefronts to floors and buildings, into valuable space for marketing, branding, and storytelling.

PROMEDIA LIQUIDS

Our unique range of ProMedia products suitable for cleaning and restoration serves an array of functions including removing sticky adhesive residue from surfaces like glass, steel, and more. It's a must-have for both your professional and personal cleaning collection.

Available in 500ml spray bottles

Available in gloss in 1L and 2L

APPLIKLEEN

Surface cleaner

Cleans delicate surfaces before vinyl application (like vehicles, trophies, etc) and evaporates quickly leaving your surface clean and dry.

GLUGON

Adhesive remover

This product is used in removing adhesive from chromadek, steel plastics, acrylics, glass, wood, PVC, ABS and more.

Check out our video on how to use this amazing tool.

LIQUISHIELD

Liquid laminate

ProMedia LiquiSHIELD is a urethane based liquid laminate. It is highly flexible yet hard-wearing and provides long-term protection against abrasion. It's also chemical and UV resistant. LiquiShield is used as a top coat to protect signage like ABS boards, PC boards, vinyl, PVC decals, banners, Fiberglass, wood, metal and plastics.

Properties

- Excellent flexibility
- No yellowing
- Low odour
- Non-flammable
- Zero tack level

Intermediate
Created for high performance. Designed for long-term, outdoor signage requirements.

MONOMERIC

ECO- VINYL

1 year

Our ProMedia Economy Vinyl is designed to its name - to be efficient for work and for your pocket. It is best suitable for fast-moving goods like labels for water bottles, stickers and short-term indoor signage.

Available in Grey back & White back, gloss & matte.
80 and 100 micron available in 1370mm wide x 50m rolls.

BUBBLE FREE

2-3 years

Our promedia bubble free monomeric vinyl is a longer lasting vinyl that is suitable for indoor and outdoor signage, wide-format digital printing such as vehicle advertising, outdoor durable signage and product labels.

Available in matte or gloss
1.37m/1.52m

COLD LAMINATE FILM

2-3 years

For a clean, smooth and professional finish that. Protect against UV fading. Prevent scratching and scuffing, Extend the life of the graphic.

Available in matte or gloss 1.37m/1.52m

Understanding the difference between calendered and cast vinyls

POLYMERIC

POLYMERIC BUBBLE-FREE

5 year

Our promedia Polymeric bubble free Polymeric vinyl is a longer lasting vinyl that is suitable for indoor and outdoor signage, wide-format digital printing such as vehicle advertising, outdoor durable signage and product labels.

Available in matte or gloss 1.37m/1.52m

POLYMERIC BUBBLE-FREE

5 year

For a clean, smooth and professional finish that. Protect against UV fading. Prevent scratching and scuffing, Extend the life of the graphic.

Available in matte or gloss 1.37m/1.52m

DIGILINE 5G WHITE

5 year

This self-adhesive vinyl is ideal for medium to large sized prints that are made for short or medium term promotional application on flat or slightly curved surfaces (whether water, solvent, latex or UV)

Available in Matte or Gloss in 1370 and 1520

DIGILINE 5G CLEAR

5 year (Laminate)

Ideal for lamination and protection of medium to large sized prints (whether water, solvent, latex or UV) on flat surfaces. It is UV stabilised (prevents colour fading) and offers protection against fingerprints as well as mechanical, chemical and abrasion resistance.

Available in Matte or Gloss in 1370 and 1520

SPECIALITY

ULTRA TACK

Wallpaper vinyl

Our ProMedia Ultra Tack is one of our most powerful self-adhesive PVC films yet. It is a printable 100 micron vinyl that features a thick clear glue and a release paper with double-sided PE coating. Producing the best high-end print results. It is ideal for indoor and outdoor signage, product labels, and wide-format digital printing.

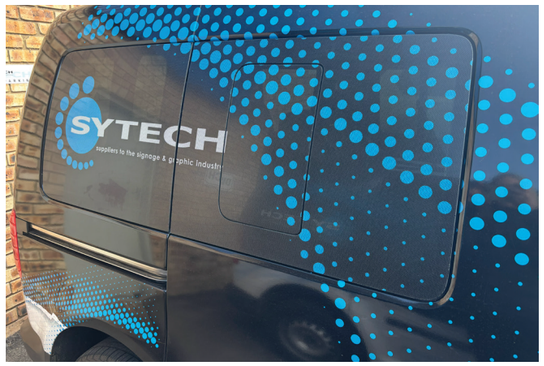

Available in matte and gloss white on a 1370m x 50m roll.

CONTRAVISION

OneWay Vision vinyl

Our contravision vinyl is specifically engineered with a semi-permanent adhesive to make your life easy during application & removal of this product. It's a satin white 160 micron vinyl.

Available on a 1.37m x 50m roll.

DECOFILM

Silver Etch Window Film

This media ensures low visibility with high light transfer which is perfect for applications onto glass surfaces such office or shower doors. This printable vinyl is primarily used for cut-outs and dry applications although wet applications can be successful as well.

Available in 610,1220, and 1520 wide

PHOTOLUMINESCENT

Glow in the dark/ Reflective

Our Photoluminescent digital film has the initial lighting source of 1000LX and its activating time is 15 minutes. It has a gloss finish and is available in a light green colour. It has a durability of 8 years indoors and 5 years outdoors

Please note that our Photoluminescent is not SABS

Available in 124cm x 45.7m rolls.

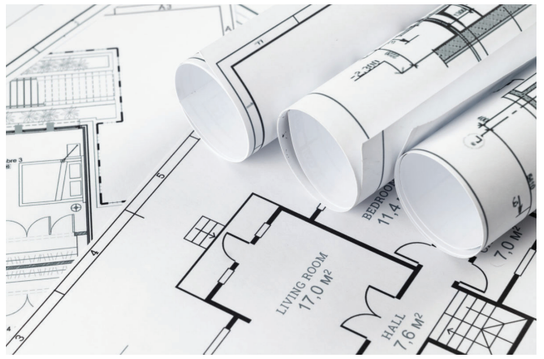

SYNTHETIC PAPER

Tear Resistant Poster Paper

Our synthetic poster paper is the same high-quality material used for movie posters in cinemas and other promotional displays, offering durability and a premium finish. It is tear resistant with a satin finish. It is sold per roll.

Available in 50mx1520wide, 190gsm.

PLOTTING PAPER

Printable Paper

Ideal for short term projects - large-format printing of technical drawings, plans, and designs.

Available in 80gsm in 50m x 1270wide,
50m x 610wide, 100m x 1370wide

CANVAS

Anti-scratch Poly-cotton canvas

Our printable poly-cotton canvas base fabric features 80% polyester and 20% cotton. It is an eco-solvent/UV/ Latex and has anti-scratch properties. Designed with a matte surface and yellow back with high tensile strength and 380gsm. Our superior canvas is notoriously used for indoor/outdoor signage, block mounts, printing, painting, and more.

Available in a width size of 1370m on a 30m roll.
Meter sizes are also available.

TIPS FOR APPLYING SIGNAGE VINYL IN COLD WEATHER

Scan to read more

In cold conditions, vinyl can become brittle and more challenging to cut, necessitating adjustments to the cutting depth. This can also complicate the application process, as the initial adhesion of the vinyl may be compromised, and the adhesive may take longer to cure fully. To achieve a flawless finish, consider incorporating additional steps into your normal standard vinyl application routine.

RIDGID SUBSTRATE

CAST ACRYLIC

10 year outdoor warranty

Our Cast Acrylic sheets, made from 100% virgin material, deliver superior transparency, colour fastness, and precision. Backed by SGS Certification, the entire range comes with a 10-year comprehensive warranty.

Available in a variety of colours 3mm-20mm
3050x2050/ 2440x 1220 sheets

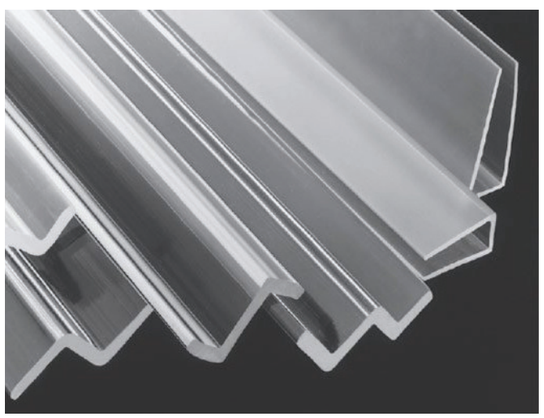

MIRROR ACRYLICS

Our Mirror Finish Acrylic combines durability with a protective cladding for uncompromised quality. Lightweight, flexible, and shatterproof, it's ideal for signage and interior décor—a true reflection of our trusted range.

Available in Gloss or Frosted 3mm-20mm 3050x2050/
2440x 1220 sheets

EXTRUDED ACRYLIC

Our Extruded Acrylic Sheets meet strict standards, offering <10% tolerance, 93% transparency, and a 10-year warranty. Delivering cost efficiency and reliability for the Sign & Display market.

CHROMADEK

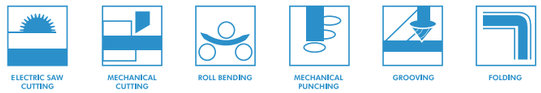

Chromadek Sheets are made from premium steel, chemically treated and primer-coated for superior outdoor durability. Backed by a 10-year corrosion warranty, they're the ideal choice for tough outdoor signage applications.

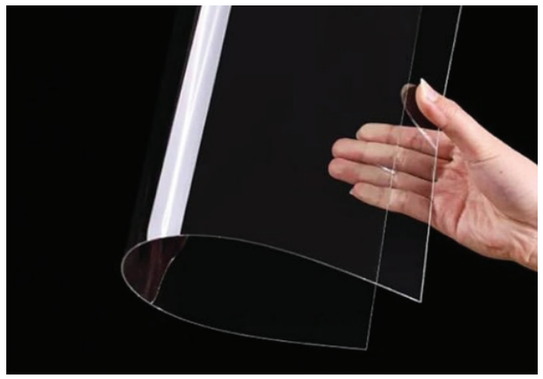

ALUBOND

A light-weight PVC sandwiched between 2 sheets of aluminium, Alubond is available in a variety of colours to suite every requirement you may request. Comes in a gloss and matte finish. Ideal for outdoor use.

Available in 1.22m x 2.4m and 1.5m x 3m sheets.

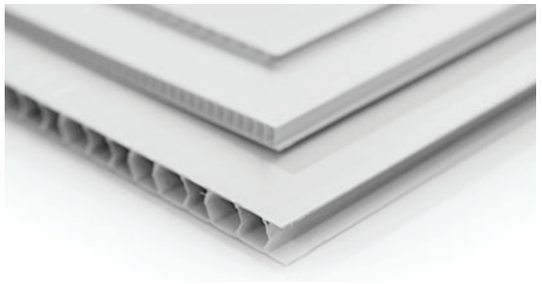

POLYCARBONATES

Polycarbonate Sheets offer excellent optical and mechanical properties, backed by a 10-year warranty—ideal for both signage and industrial applications, indoors or outdoors.

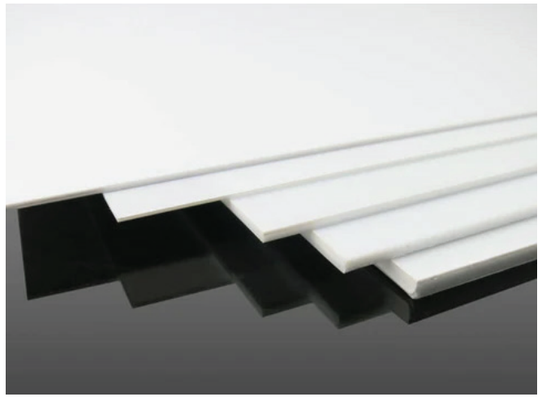

FOAM PVC SHEET

Our re-formulated Foam PVC Sheet delivers enhanced strength and flexibility while retaining rigidity. Versatile and reliable, it's designed to meet a wide range of applications with confidence.

CORREX

Correx is a lightweight, durable corrugated plastic board designed for versatile indoor and outdoor signage applications. Its fluted structure provides excellent strength while remaining easy to cut, print, and install. Ideal for estate agent boards, promotional signage, and point-of-sale displays, Correx offers a cost-effective and weather-resistant branding solution.

ABS SHEET

ABS sheets are a signage and display industry staple. We've enhanced them with a heat-resistant, single-sided cladding that protects against scratches and withstands heat bending and laser cutting—delivering added value at no extra cost.

KT BOARDS

KT Board is now part of our range, designed for the growing flatbed printing industry. Lightweight yet durable, it's the ideal choice for indoor signage and advertising.

DID YOU KNOW

Rigid substrates are designed to stay perfectly flat and stable, which is why they're trusted for everything from roadside billboards to retail displays. Unlike flexible materials, they won't warp or wrinkle, meaning your graphics always look sharp and professional. Some, like Correx, are even lightweight yet strong enough to be reused multiple times, making them a cost-effective signage solution. How many sign materials do you see every day?

DISPLAY

SANDWICH BOARDS

'A' frames

Sandwich boards are a brilliant way to draw in street traffic. It optimizes visibility to consumers with its double-print side advantage. Our boards are made from chromadek, making them light and durable and is perfect for industrial signage.

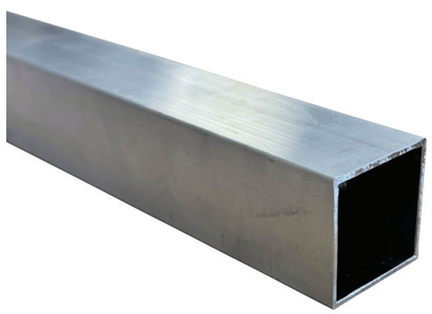

Available in 975mm X 500mm

HANGER KITS

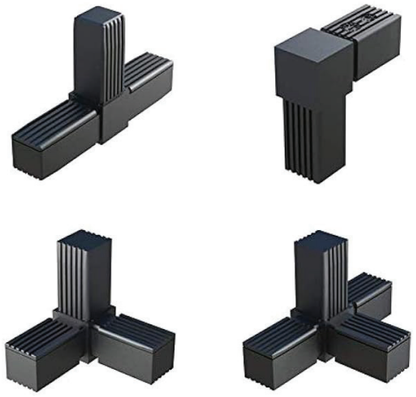

With four different options to choose from, our comprehensive and affordable hanger kits are perfect for hanging an array of media. The kits offer two 200mm rails, in addition to two hanger clips (or hooks with wire), four end caps to securely keep the media in place, and one hanger kit for the poster.

- Hanger Kit 1: 2x 1m length wires + 4 set of screws
- Hanger Kit 3: 2x 1m length wires + 2 Hooks
- Hanger Kit 4: 2x 1m length wires + 2x 5mm clamps
- Hanger Rail Set: 2x 2m length rails + 4 clips + 1x Hanger Kit 3

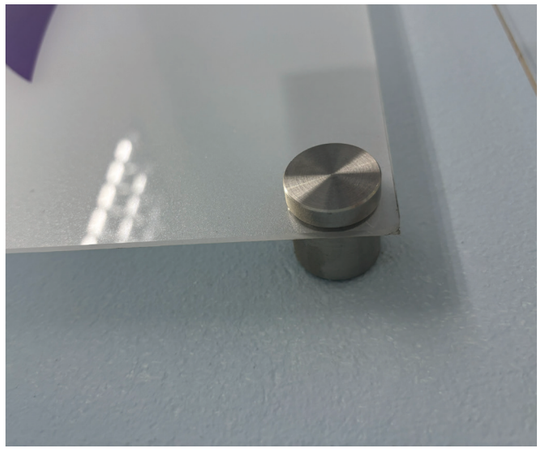

ALUMINIUM SQUARE TUBING

We supply 25x25x1mm Aluminium Square Tube in 3m lengths. Perfect for Chromadek sheets, reducing wastage and ensuring easy transport and processing.

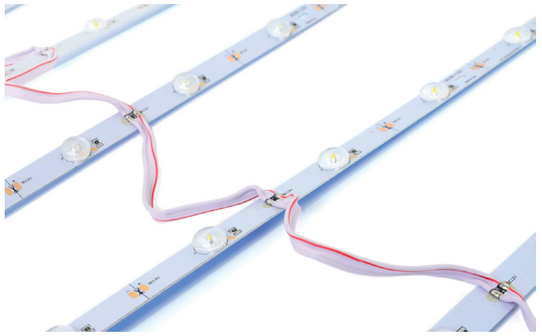

SQAURE TUBE CONNECTORS

We carry a full range of plastic connectors which have been specifically sourced to work in conjunction with our Aluminium Square Tube 25X25. They are manufactured from Polypropylene and are strong, durable and cost-effective.

SPACER MOUNTS

Spacer mounts create a modern floating effect for acrylic, glass, aluminium, and composite signage. Made from durable, corrosion-resistant stainless steel or aluminium, they are suitable for indoor and outdoor use. Easy to install, they add a sleek, professional finish to reception signs, office directories, and branding panels.

LED

Our LED lights feature high-efficiency 2835 SMD chips, run on low-voltage DC 12V, and are IP65 water-resistant. With synchronized color-changing, CE & RoHS certification, and a 3-year warranty, they're built for performance and long-lasting quality.

60W = 30 LED's
100W = 50 LED's
150W = 80 LED's
200W = 100 LED's
300W = 160 LED's

LED POWER SUPPLIES

Our power supplies feature built-in protection against short circuit, overload, and overheating, with efficient cooling through free air convection. Each unit is 100% full-load burn-in tested for reliability, designed specifically for LED lighting applications, certified to CE and RoHS standards, and backed by a 3-year warranty for added peace of mind.

OUR SERVICES

Semi-finished cutting service.

Send us your artwork and we will supply your material cut as per your artwork

T's & Cs apply

GUILLOTINE

We are able to cut our standard Chromadek sheets to your required size. Our guillotine is hydraulic and automated to ensure we are able to accommodate high volume cutting jobs to exacting specifications.

PANEL SAW

We offer a cutting service on our horizontal panel saw for all our plastic substrates. We are able to assist our customers with multiple panel size requirements using our CAD nesting program to ensure sheet optimization, minimising wastage and saving you money.

FLAT BED CNC ROUTER 3M X 2M

Our router with a 3m x 2m bed size is able to process complex shape cutting according to your specific needs. The extended bed size is also perfectly suited to our 3050mm x 2050mm ILA acrylic sheet size. Our endeavour is to become an extension of your production process.

LASER CUTTING ENGRAVING MACHINE

Our laser cutting and engraving machine is designed to cut through acrylic and wood with a working area of 1300 x 900mm. Equipped with a constant light path system, it delivers uniform optical precision across the entire workspace, ensuring consistent cutting speed, accuracy, and premium-quality results every time.

PAINT PROTECTION FILM

Our Paint Protection Film from Sytech is an exceptional choice for safeguarding and preserving your vehicle's appearance. This innovative film offers unparalleled protection and maintenance capabilities, ensuring your vehicle remains in pristine condition for a longer period of time.

Features

- Unparalleled scratch protection
- Defying the sun's wrath
- Preserving resale value
- Cutting-Edge self-healing capabilities
- Versatility for all makes and sizes
- Long-term cost savings

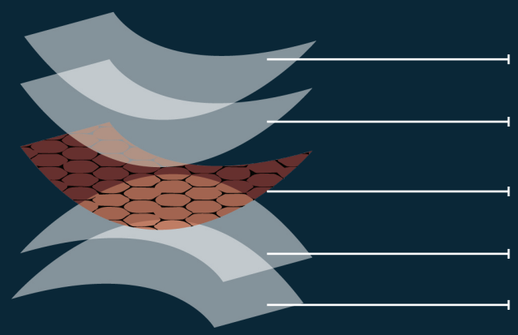

Product Specifications

- 167 micron
- Self-healing
- 3year warranty against yellowing
- PU (Polyurethane)

Available in clear (matte/gloss) or black (matte/gloss) 15m roll at 1520wide

5 LAYER PROTECTION

This cutting-edge technology comprises of five layers designed to provide optimal protection for your vehicle against potential damage.

1) Surface PET protection liner

2) High performance self-healing (with heat) clear coating

3) Thermoplastic polyurethane (TPU) film

4) Acrylic pressure sensitive glue

5) Bottom PET release liner

TITAN

POWERVEHICLE GRAPHICS

Innovative solutions designed to elevate your designs and withstand the rigors of motorcross.

- Adhesion you can trust
- Easy application with micro-channels
- Extreme durability
- UV-resistant and scratch-proof overlams

TITAN LAM 250 GLOSS
(TLG – 250)

- Gloss clear finish
- 250 micron
- 50 micron solvent acrylic adhesive
- Lay-flat kraft paper liner
- 1370mm x 45m

TITAN HOLO SILVER
(THSX – 110)

- Micro-channels for optimal airflow and easy application
- Holographic Silver finish
- 110 micron
- 30 micron solvent acrylic adhesive
- Lay-flat kraft paper liner
- All ink technologies
- 1370mm x 50m

Colours available
- Red
- Gold
- Silver

MUGS

Our popular 11oz white mugs are loved by many—some choose to display them as keepsakes, while others enjoy every sip from their favorite new cup.

Colours available
- Black, Red & Navy colour changing
- White

CUSHIONS

A printed cushion is the way to go if you want to impress your friend who's an avid couch potato. Personalize your 30x30cm soft and silky finish cushions for home use, gifting, or decorative purposes. Filling is included.

Colours available
- Black
- White
- Red
- Blue
- Pink

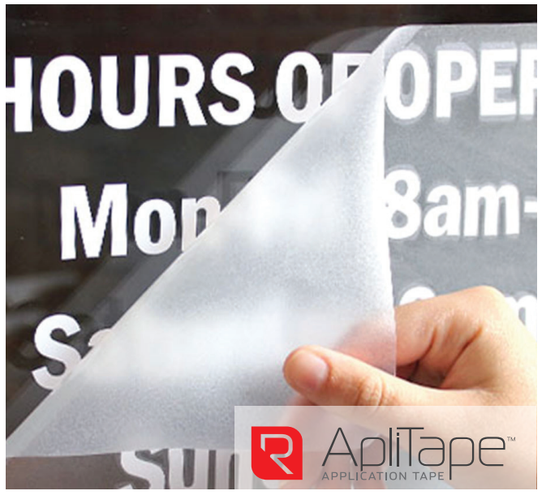

HEAT RESISTANT TAPE

Our heat resistant tape can withstand temperatures of up to 300° and the sublimation process for mugs, plates, almost all ceramics, mousepads, coasters, holding transfers in place for t-shirts and much more!

Width
- 33 meters
- 10mm

r.tape

4075

ApliTape 4075 is a standard grade paper saturated paper application tape, coated with a high tack rubber adhesive.
Great choice for most sign shop applications from small and medium graphics to large plotter cut letters.

Features
- Standard paper premask
- Low tack rubber adhesive

Benefits
- Transfers small to medium sized graphics
- Transfers large plotter cut letters
- Removes easily following application
- Large plotter cut letters

AT65

Clear Choice AT65 is an ultra-clear, high-tack application tape designed for versatile sign applications. It is ideal for transferring small, detailed cut graphics and intermediate calendared vinyl films with tight liner release. Its clear polypropylene film allows precise multi-colour registration while minimizing stretching for accurate graphic alignment.

Features
- High tack adhesive
- Easy unwind
- Exceptional lay flat characteristics
- Resists tunneling and curling
- Re-usable

Benefits
- Universal performance for a wide range of applications
- Extended shelf life even after lamination
- No milky residue when used for wet applications
- Small, high detail cut graphics
- Vinyl films with tight release
- Multiple colour graphic overlays
